## CRYPTO STAKING

# Introduction

We all know that XRPL is affected by multiple project scams nowadays. Our team have taken time to study and came up with a solution that will benefit everyone through a token on XRPL on which we will do unlimited staking and by giving infinite rewards to holders.

With the help of the team's years of experience with cryptographic currencies, we formed an alliance that will help the community to gain more knowledge with the crypto market and staking. This gave birth to XRCS in the XRP Ledger.

# Staking and Rewards

Staking is a way to put your crypto to work and earn rewards on it. Staking cryptocurrencies is a process that involves committing your crypto assets to support a blockchain network and confirm transactions.

To put into perspective XRCS will give 8% interest every 15 days staking process as a reward for holders.

Addressing some chokepoints, XRCS will put a buy wall depending on the profit earned on the staking process making lowering the risk of losing due to volatility. Traders will now have enough reaction time for a proper exit or re-entry.

Providing a bird's eye view on how the allocation will look, here are the allocations; 80% will be put on staking and 20% will be liquidity reserved.
